Marie Clay’s Observation Survey consists of five tasks, which inform a different aspect of a child’s literacy learning. Learn how Running Records allow teachers to effectively and accurately observe, record, and analyze a child’s reading to make effective teaching decisions. Find answers to what a child knows, what s/he needs to learn, and which direction your teaching should take. The Observation Survey and Running Records powerfully exemplify how assessment can drive your practice.

Each participant will receive Marie Clay’s “Observation Survey of Early Literacy Achievement” which is published in both English and French and resource binder.

Presenter: Elvi Cabrone & Vickie Hong,
VSB Reading Recovery & Literacy Enhancement Teachers
